#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Evidence for Evolution

How are DNA and comparative anatomy used to show relationships?

Why?

"You look just like your mother!" "She has his father's eyes." These comments that refer to the similarities between parents and their children are heard often in conversations. These similar traits are due to the genetic material that children inherit from their parents. As humans we are sometimes fortunate enough to have these or few generations sitting in a room at one time, and we can see the similarities from generation to generation. But how much do you look like your ancestors from 100 generations ago, 1000 generations ago or more? How much of your DNA did you inherit from these ancestors? What traits do you share with them?

Model 1 - Family Characteristics

1. Model 1 is a family tree. Circle the original parents of the family.

2. How would you describe the organisms in the second row of Model 1 that are connected to the parents by a line?

3. Identify the three members of the family that "started in" by placing a star next to their names in Model 1.

4. How are the organisms in the third row related to the organisms in the first row?
